HELP VERIFY MEDICINE X 2016 AS AN EVERYONE INCLUDED™ TIER 4R CONFERENCE

Stanford Medicine X 2016 is an Everyone Included™ Tier 4R conference. We support the Everyone Included™ principles of inclusivity and mutual respect, provide an environment where all stakeholders are invited to participate in any activity and all resources available at our event. We believe in and support patient/participant partnership in research and provide activities and resources at our event that support patient/participant partnership in research.

We invite you to help us verify that we delivered on our promises as an Everyone Included Tier 4R conference. You'll also have a chance to provide feedback to an independent third party (Symplur) who publish their findings on their Symplur Health Care Hashtags website.
